England Test Cricket

Dashboard Data Summary

Historical dataset snapshot | Prepared 27 October 2026, 14:39 GMT

Executive Summary

The dashboard contains **297 Tests** and **579,336 recorded deliveries**: 278 men's Tests and 19 women's Tests. All findings below describe the two local Cricsheet exports, not the complete history of England Test cricket.

Team	Tests	Deliveries	Match-start coverage
Men	278	541,303	19 Dec 2001 to 09 Sep 2026
Women	19	38,033	22 Feb 2003 to 10 Jul 2026

Results at a Glance

Team	Won	Lost	Drawn	Win rate
Men	124	99	55	44.6%
Women	3	7	9	15.8%

Key observations: the men won 124 of 278 included Tests (44.6%). Draws are the most common women's result: 9 of 19 (47.4%). These percentages use all included Tests as the denominator.

Interpretation: the men's and women's samples differ greatly in size, opposition and dates. Differences in win rates are descriptive, not evidence that one team is stronger. Player totals also reflect opportunities and source coverage.

Scope: historical tabs only, with no sidebar filters applied. BBC upcoming fixtures and live scores are intentionally excluded: consult the dashboard for those changing feeds. This PDF does not refresh automatically.

Match Results by Opposition

Men's Tests

Opposition	Tests	Won	Lost	Drawn	Win rate
Australia	61	19	32	10	31.1%
Bangladesh	9	8	1	0	88.9%
India	50	19	21	10	38.0%
Ireland	2	2	0	0	100.0%
New Zealand	30	14	9	7	46.7%
Pakistan	34	17	12	5	50.0%
South Africa	31	14	11	6	45.2%
Sri Lanka	25	12	6	7	48.0%
West Indies	35	18	7	10	51.4%
Zimbabwe	1	1	0	0	100.0%

Women's Tests

Opposition	Tests	Won	Lost	Drawn	Win rate
Australia	12	2	4	6	16.7%
India	5	0	3	2	0.0%
South Africa	2	1	0	1	50.0%

What the Results Suggest

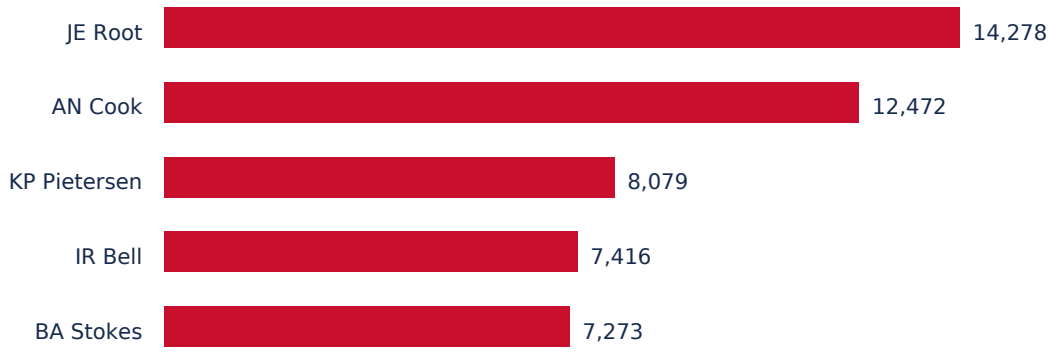

Australia accounts for the largest opposition sample in both groups. The men's included Australia Tests show more losses than wins; the women's Australia sample is most often drawn. Use Match Centre to investigate dates and individual Tests before interpreting these differences.

Very small samples, such as one or two included Tests against an opponent, can produce extreme win rates. The report does not adjust for venue, era, conditions or strength of opposition.

Men's Player Summary

England Batting Leaders

Top five source labels ranked by runs in the included England batting deliveries. Averages are runs per recorded dismissal.

Player label	Runs	Appearances	Average	Highest	100s
JE Root	14,278	169	50.45	262	41
AN Cook	12,472	161	45.35	294	33
KP Pietersen	8,079	100	48.38	227	23
IR Bell	7,416	114	42.38	235	22
BA Stokes	7,273	121	34.47	258	14

England Bowling Leaders

Top five source labels ranked by credited wickets. Ties follow the dashboard's lower-runs-conceded ordering.

Player label	Wickets	Appearances	Average	Economy
JM Anderson	682	181	26.41	2.77
SCJ Broad	604	166	27.68	2.98
GP Swann	255	60	29.97	2.99
BA Stokes	252	108	30.98	3.33
MM Ali	204	68	37.31	3.62

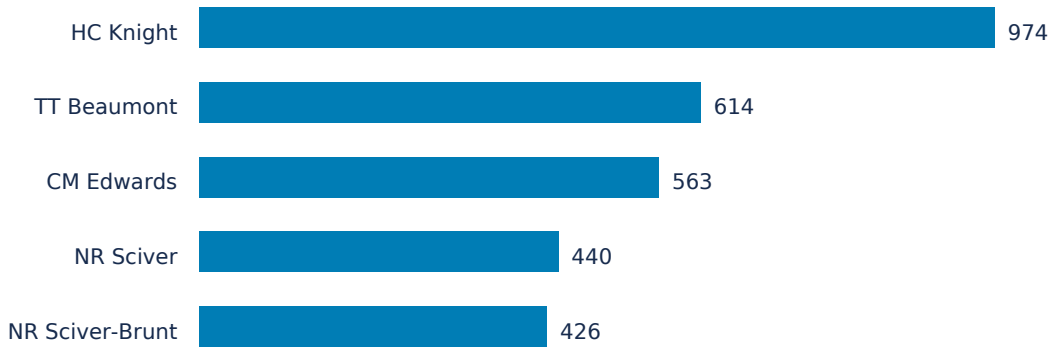

Dataset leaders: JE Root has 14,278 recorded runs; JM Anderson has 682 credited wickets. These are totals within this export, not verified complete career statistics.

Appearances count recorded batting or bowling activity, not full team selections, so batting and bowling appearances can differ. A high cumulative total is not an exposure-adjusted measure of quality.

Women's Player Summary

England Batting Leaders

Top five source labels ranked by runs in the included England batting deliveries. Averages are runs per recorded dismissal.

Player label	Runs	Appearances	Average	Highest	100s
HC Knight	974	14	42.35	168	2
TT Beaumont	614	12	30.70	208	1
CM Edwards	563	9	40.21	114	1
NR Sciver	440	7	48.89	169	1
NR Sciver-Brunt	426	5	42.60	128	1

England Bowling Leaders

Top five source labels ranked by credited wickets. Ties follow the dashboard's lower-runs-conceded ordering.

Player label	Wickets	Appearances	Average	Economy
S Ecclestone	48	10	28.67	2.91
KH Brunt	39	10	20.44	2.45
LA Marsh	22	8	34.86	2.40
LK Bell	21	6	24.33	3.41
KL Cross	19	7	36.74	3.29

Dataset leaders: HC Knight has 974 recorded runs; S Ecclestone has 48 credited wickets. These are totals within this export, not verified complete career statistics.

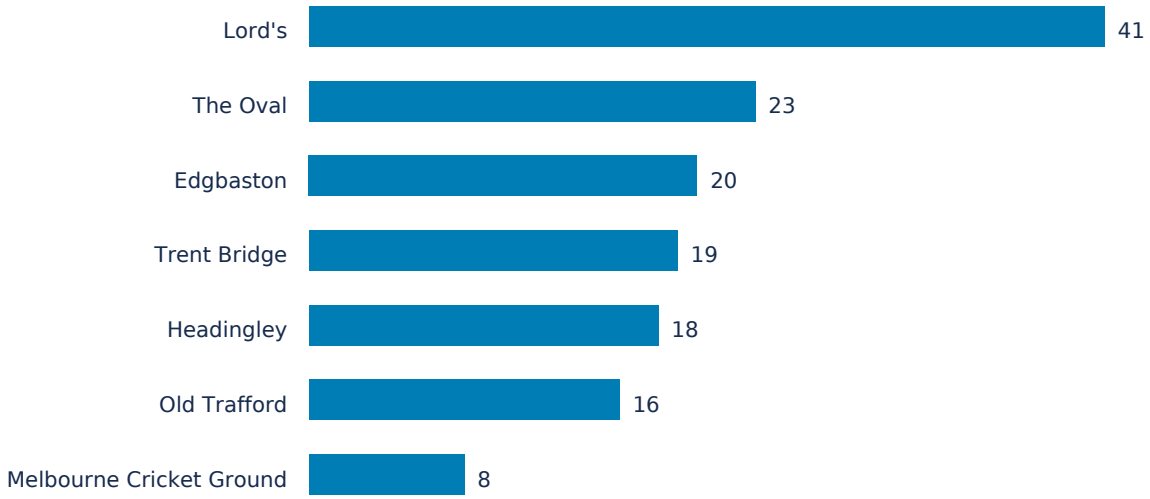

Name-label limitation: NR Sciver and NR Sciver-Brunt appear as separate labels. No identity reconciliation has been performed. Do not infer the number of unique people or combine labels without checking a player registry.

Appearances count recorded batting or bowling activity, not full team selections, so batting and bowling appearances can differ. A high cumulative total is not an exposure-adjusted measure of quality.

Grounds and Innings Highlights

The exports cover **76 distinct mapped grounds** after venue aliases are combined. Every included venue has a coordinate-catalogue match. Counts below combine men's and women's Tests.

Most Represented Grounds

Ground	All Tests	Men	Women
Lord's	41	40	1
The Oval	23	23	0
Edgbaston	20	20	0
Trent Bridge	19	18	1
Headingley	18	18	0
Old Trafford	16	16	0
Melbourne Cricket Ground	8	7	1

Highest Recorded England Team Innings

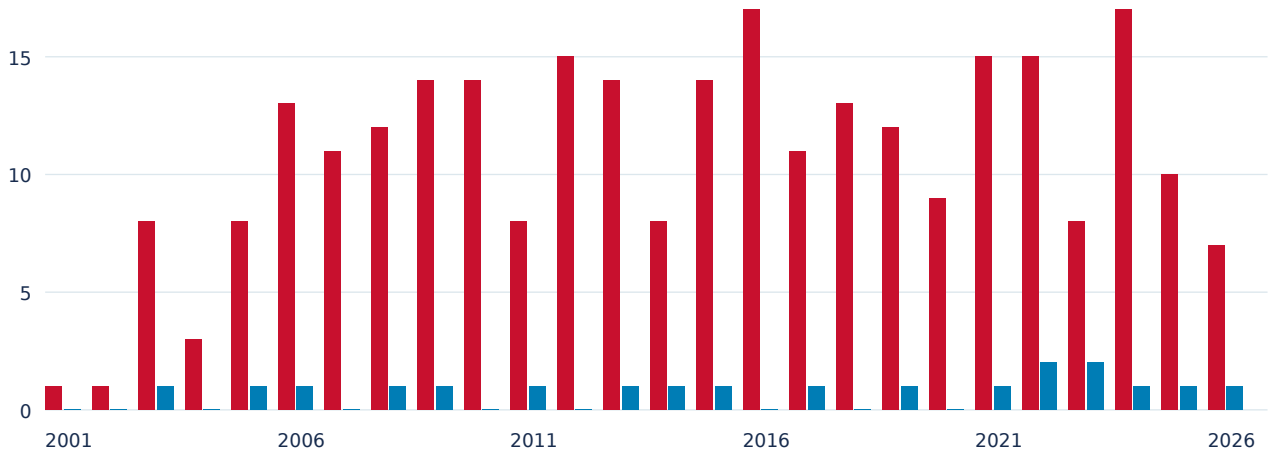

Men: 823 recorded runs against Pakistan at Multan Cricket Stadium; match started 07 October 2024.

Women: 463 recorded runs against Australia at Trent Bridge, Nottingham; match started 22 June 2023.

These highlights are delivery-derived totals; they are not labelled as official all-time records. The map describes where included matches took place, not attendance, ground capacity or a proven home advantage.

Coverage over Time

Annual counts use the year of each match's start date. They show representation in the exports, not the complete number of Tests England played.

Red: men | Blue: women | Vertical axis: included Tests

Recent Included Match Counts

Year	Men	Women	Combined
2020	9	0	9
2021	15	1	16
2022	15	2	17
2023	8	2	10
2024	17	1	18
2025	10	1	11
2026	7	1	8

Do not treat changes in these bars as a performance trend. Variation can reflect match schedules and missing source coverage. The latest year is a snapshot and may be incomplete. Men's and women's exports also have different latest match dates.

Suggested Dashboard Follow-up

Use the historical date and opposition filters to investigate narrower periods; inspect scorecards in Match Centre; compare player tables only after aligning the selection. Use the BBC tabs separately for current activity, rather than expecting this report to update.

Methods, Checks and Limitations

How the Summary Was Calculated

The report uses the same load_data, batting_table, bowling_table and innings_table functions as the dashboard. One row per match_id defines a Test. All included matches involve England. Match-start dates define temporal coverage; England outcomes follow the export winner/result fields. Player sections select England batting or bowling deliveries within each gender separately.

Win rate = wins / all included Tests, including draws. Bowling average = conceded runs / credited wickets; economy = six times conceded runs / legal balls. Bowler-conceded runs exclude byes, leg-byes and penalty extras. Run-outs are not bowler wickets. Batting dismissals include run-outs; retired hurt and retired not out are excluded.

Checks Completed for This Snapshot

Check	Result
Distinct match identifiers	297; no duplicate match rows after extraction
Delivery identifier duplicates	0; key: match_id, innings, over, delivery_in_over
Men/women reconciliation	Match counts sum to 297; delivery counts sum to 579,336
Venue coverage	All included venues map to a unique catalogue row with coordinates
Innings run reconciliation	Sum of innings runs equals sum of delivery runs
Match dates and gender	All match-start dates present; one gender per match

Limitations That Affect Interpretation

This is a convenience sample of available deliveries, not a certified complete archive. No independent official-scorecard reconciliation was performed. Penalty adjustments outside recorded deliveries, historical declarations, follow-on status and victory margins are not included. Name changes and aliases can split one person's records; no player registry matching was performed. Results are descriptive and do not control for era, opposition or conditions. Ground coordinates are approximate.
